

pacificinterpreters™

We understand.

SERVING A GLOBAL AUDIENCE

Pacific Interpreters™ offers document translation in over 75 different languages to complement our over-the-phone services. We specialize in the translation of business documents, including proposals and contracts, training materials, marketing collateral, web pages and many other types of communications. Translated documents are formatted to match the original design unless modifications are specified, and delivery is available electronically or by courier. Notarized translations are also available.

ACCURACY

Our translators are located worldwide and are certified by the American Translators Association (ATA), or by similar associations in their native countries. Each translated document is reviewed at least twice, once by an independent editor and again by our in-house translation quality assurance team. This two-level review process ensures the accuracy of the final product.

SPEED

We understand the importance of on-time delivery. We will provide you with a realistic delivery date and deliver on time or ahead of schedule. Providing Pacific Interpreters with an electronic document will help expedite your order.

Document Translations

Government & Business

AFFORDABILITY

Because of the many variables involved, each project is quoted individually based on the following elements:

- Source format (electronic or printed)
- Language
- Word/page count
- Graphics
- Final deliverable format

Typical pricing ranges between \$0.19 and \$0.25 per word. An average page of 330 words would cost between \$62 and \$83 delivered in final format. There is a minimum charge of \$75 per project. Additional discounting for large or recurring projects may apply.

WEBSITE LOCALIZATION

Pacific Interpreters has developed a strategic alliance to offer you website localization. These services help you ensure that your website is clearly communicating your message with linguistic accuracy and cultural appropriateness. Localization of your website will analyze rich media, images, audio, and interactive components for cultural competency and cohesiveness in each target language. Please contact us for pricing.
